Digital Stamp Card — Business Guide

Reward your regulars with a digital loyalty card. You set the rule, add a stamp for each purchase, and hand over the reward when the card is full. Customers can never stamp their own card — only you do.

1. Set up your card (once)

1. Sign in on aroundyou.co.za and choose **Partner**, then open your business profile.
2. Scroll to the stamp-card section and tick **“Turn the loyalty card on for my customers”**.
3. Set **Stamps needed for a reward** (for example 10).
4. Type the **Reward** the customer earns (for example “Free coffee”).
5. Tap **Save card settings**. Your card is now live — your business name shows on it automatically.

2. Add a stamp (every purchase)

1. In the **“Add a stamp”** box, pull up the customer’s card: tap **Scan customer’s QR code** and point your camera at their screen, **or** type their **mobile number** and tap **Look up**.
2. Their card appears showing, e.g., **“6 of 10 stamps.”**
3. Choose how many stamps to add (usually 1), then tap **Add 1 stamp**.

3. Redeem the reward (when the card is full)

1. Pull up the customer’s card the same way — **Scan their QR code** or **Look up** their mobile number.
2. When the card is full you’ll see a green **Redeem reward** button. Tap it.
3. You’ll see **“Reward redeemed.”** Hand over the reward.
4. The card resets to empty automatically so the customer can start collecting again.

What your customer does

1. On their phone, they tap **My Stamp Cards**, enter their **mobile number**, and tap **Find**.
2. They show you the **QR code** on their screen (or just give you their mobile number).
3. When their card is full it shows a **“Reward ready!”** badge — that’s your cue to redeem it.
4. If they collect at more than one shop, they **swipe** to the right card first.
